WOODSIDE AWARDS SHORE BASE CONTRACT FOR TRION PROJECT

Woodside Energy announced today that it had awarded a major contract to Mexican company Eseasa Offshore, S.A. de C.V. to supply shore base facilities and services for Woodside's operations supporting the Trion oil and gas project offshore Mexico.

Woodside Vice President for Trion, Stephane Drouaud, highlighted the significance of the contract award to Eseasa Offshore.

"The award of the contract is a critical milestone as we continue to progress the Trion project toward first oil in 2028. We are very pleased to partner with Eseasa Offshore as the supplier of the full range of shore base facilities and services.

"The contract award to Eseasa, a Mexican owned and operated company, demonstrates the great capacity available in-country to support a world-class oil and gas project like Trion.

"It also reinforces Woodside's commitment to investing locally and ensuring that the economic benefits of our investment in Trion are felt as broadly as possible across Mexican suppliers," he said.

Eseasa will provide a broad range of services out of its shore base location on the Panuco River coastline. The scope of work includes shore base infrastructure, operations planning and management for vessel mooring, load and discharge, freight and material management and dedicated laydown and staging areas.

About Woodside Energy

Woodside Energy is a global energy company, founded in Australia, working across three continents to produce oil and natural gas and pursue new energy opportunities. In Mexico, Woodside is progressing the Trion oil and gas project in the Gulf of Mexico and has also announced an agreement with Mexico Pacific Limited to purchase 1.3 million tonnes per annum of liquefied natural gas (LNG) for 20 years.
