

BROWSE PROJECT

AUSTRALIA'S LARGEST UNTAPPED CONVENTIONAL GAS RESOURCE.

In September 2018, the Browse Joint Venture selected the Browse to North West Shelf Project development concept and commenced the concept definition phase.

Development concept

Woodside Energy Ltd (Woodside), as Operator for and on behalf of the Browse Joint Venture (BJV), is proposing to develop the Brecknock, Calliance and Torosa fields located approximately 425 km north of Broome in the offshore Browse Basin.

In September 2018, the BJV selected the Browse to North West Shelf (NWS) Project development concept to progress into the concept definition phase.

The proposed development concept includes:

- + two floating production storage and offloading (FPSO) facilities delivering 11.4 Mtpa of LNG/LPG and domestic gas; and
- + an approximately 900 km pipeline to existing NWS Project infrastructure.

Developing Browse through existing Woodside-operated infrastructure has the potential to deliver a globally competitive project to the benefit of governments, communities, titleholders and infrastructure owners.

Key work activities continue in support of progress towards front-end engineering and design (FEED) entry, including securing relevant regulatory approvals, progressing commercial agreements and pursuing technical value optimisation opportunities.

The Browse Joint Venture is evaluating a range of options to manage and reduce greenhouse gas emissions, including assessing the feasibility of carbon capture and storage as well as opportunities to improve energy efficiency.

Participating interests	%
Woodside Browse Pty Ltd	30.60
Shell Australia Pty Ltd	27.00
BP Developments Australia Pty Ltd	17.33
Japan Australia LNG (MIMI Browse) Pty Ltd	14.40
PetroChina International Investment (Australia) Pty Ltd	10.67
