Dear Corporate and International Tax Division

WOODSIDE ENERGY: STRENGTHENING THE FOREIGN RESIDENT CAPITAL GAINS TAX REGIME

Woodside is an Australian-headquartered global energy company, proudly founded in Australia more than 70 years ago. Woodside established the LNG industry in Australia more than 35 years ago and today supplies a growing base of customers. Woodside has reliably delivered gas to homes and businesses in Australia for more than 40 years, supporting the development of local industry and driving economic prosperity. As Australia's largest energy company, Woodside is proud of the contribution we make to Australia's economic prosperity.

To preserve and extend investment and the associated benefits for Australia, Woodside believes that tax policy and regulatory settings should maintain Australia's reputation for stability, predictability and low sovereign risk.

Any proposed change in law (particularly with retrospective impact) should be carefully considered in this context. Fiscal settings should position Australia as a competitive destination for capital and investment.

Woodside refers Treasury to the detailed submissions by the Business Council of Australia and the Corporate Taxpayers Association on the draft legislation, which Woodside supports.

Yours sincerely
