

# Our Contribution

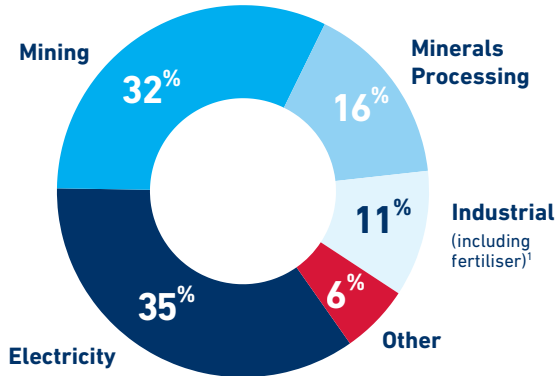

TO AUSTRALIA

We are a global energy company headquartered in Australia and operating across three continents, providing the energy to help people lead better lives.

We have delivered natural gas to Australian households and businesses for more than 40 years, supporting vital sectors like mining, manufacturing and electricity generation. As the pioneer of Australia's liquefied natural gas (LNG) industry in the 1980s, we continue to be a leading global supplier to major regional partners. We are playing a constructive role in the global energy transition, providing secure and reliable energy to our customers as economies decarbonise.

## DELIVERING Energy for Australia

In 2026, our domestic gas supply to Western Australia is supporting the following sectors...

Woodside provides large volumes of gas to power **Australian homes** and important industries like **mining and manufacturing**.

21%

We contribute about **21% of total gas supply in Western Australia**. Between 1984 and 2024, Woodside provided WA with more than 3,800 petajoules of natural gas – enough to **power more than 1 million homes for 75 years**.<sup>2</sup>

19%

All of Woodside's gas production on the east coast of Australia is delivered locally, representing about **19% of total east coast domestic gas supply**.

The Gippsland Basin Joint Venture, where Woodside is a participant, **supplies about ~40% of Australian east coast gas demand**. It also produces condensate and LPG crucial for Australian industrial processes and petrochemicals.

## New gas supply

Woodside continues to explore opportunities for new gas supply. This includes an agreement signed with ExxonMobil that could potentially deliver up to **200 petajoules of sales gas**<sup>3</sup>, in the **early 2030s**, when shortfalls to the eastern Australian market are projected.<sup>4</sup>

The proposed Browse to North West Shelf Project has the potential to provide decades of energy in Australia and the Asia Pacific region to power homes and businesses, create thousands of jobs and deliver significant tax contributions.

1. Excludes production at Perdaman.

2. 2016 and 2021 Australian Bureau of Statistics data indicates that Western Australia (WA) was expected to have more than 1.15 million households in 2023-24. Residential electricity consumption in WA was 23.5 petajoules in 2023-24 (Australian Energy Statistics, Australian Energy Update 2025). Electricity equivalence assumes generation in a modern combined cycle gas turbine. The estimate is illustrative only and does not represent actual electricity supply.

3. Under the agreement, Woodside can solely develop these opportunities through the Bass Strait infrastructure subject to further technical maturation and a final investment decision. This potential production has been identified from within the existing contingent resource opportunity set. Refer to Woodside's Reserves Statement dated 17 February 2025 for the latest disclosure on the Bass Strait reserves and resources. Subject to completion, which is subject to conditions precedent.

## OUR TAX CONTRIBUTION

### We pay our way

Woodside is **one of Australia's top tax contributors** and the largest payer of Petroleum Resource Rent Tax (PRRT).<sup>5</sup>

# 44%

ALL-IN EFFECTIVE TAX RATE

**44 cents of every dollar of profit that Woodside earns in Australia is paid in tax, royalties, excise and levies.**<sup>6</sup>

# A\$25B

PAID SINCE 2011

Over the past 15 years, Woodside has paid approximately **A\$25 billion** in Australian taxes, royalties and levies to federal and state governments<sup>7</sup>, **helping to fund important infrastructure and services for Australians.**

# A\$42B

**NWS PROJECT** Woodside's operations and growth projects deliver significant economic benefits to Australia. Our North West Shelf Project has **paid more than A\$42 billion** in federal royalties and excise since starting production.<sup>8</sup>

# A\$55B

**SCARBOROUGH** Once operational, our Scarborough Energy Project will supply secure and reliable gas for Western Australia and the world. The project is expected to **boost Australia's gross domestic product (GDP) by A\$5.5 billion per annum** and generate more than **A\$55 billion in direct and indirect taxes to Australia**, money that goes back into communities, towns and cities across the country.<sup>9</sup>

## SOCIAL CONTRIBUTION & LOCAL PARTICIPATION

### Investing in our communities

Woodside has a long history of **investing in local capability programs and infrastructure** in the communities where we live and work.

# A\$8.4B

2025 AUSTRALIAN GOODS & SERVICES

In 2025, **Woodside spent A\$14.4 billion globally** on goods and services, including almost **A\$8.4 billion in Australia**, supporting local employment and business opportunities.

# A\$5.4B

**We expect to invest A\$5.4 billion** in Western Australia during the Scarborough Energy Project development phase.<sup>9</sup>

2021-2025 SOCIAL INVESTMENT

# A\$154.3M

Delivered **A\$154 million in social investment** through strategic partnerships, philanthropy programs, employee volunteering and mandated contributions (2023-2025).

# 67,000

hours

Contributed **67,000 hours of employee volunteering** valued at **A\$18 million**, supporting the communities where we operate.

# A\$11.6M

Provided **A\$11.6 million in corporate donations and small grants** to host communities.

5. Based on ATO's 2023-2024 report of entity tax information which can be located via [www.data.gov.au](http://www.data.gov.au)

6. Average across a four-year period (FY22-FY25). Determined by total tax expense, royalties, excise, levies and other taxes, divided by profit before such taxes, adjusted for one off items.

7. Includes data relevant to the assets acquired through the merger with BHP's petroleum business from 1 June 2022. Denotes cash tax paid to 31 December 2025.

8. 100% venture. Based on amounts collected by the Australian Government in Federal Budget papers from 1984 to 2024 and other records. The main form of taxation on the NWS project has always been Federal Royalties and Federal Excise but this project is also subject to PRRT.
